PRESS RELEASE

The Army announces Warfighter FOCUS winner!

The Pentagon – The U.S. Army announced today that it has awarded the 10-year, 11-billion dollar Warfighter Field Operations Customer Support (FOCUS) contract to the Raytheon/CSC Warrior Training Alliance (WTA).

The BedRock Company, Inc is a member of the WTA as a competitively selected Service Disabled, Veteran-Owned Small Business (SDVOSB).

As one of only a few SDVOSBs selected by the WTA, The Bedrock Company, Inc. is proud to be included in the U.S. Army’s Warfighter Field Operations Customer Support (FOCUS) contract with industry giants such as Raytheon Technical Services Company, LLC, Computer Sciences Corporation (CSC), Boeing, EDS, SAIC, and Symantec to name just a few of the Raytheon/CSC WTA members.

As the war against terrorism continues overseas, training continues to play a vital role in the readiness and survivability of our Soldiers and their allies. Understanding its vital role, BedRock will help the WTA provide live, virtual, and constructive training and other training related capabilities to the Warfighter FOCUS program. Raytheon selected BedRock from hundreds of other qualified SDVOSBs to provide manpower resources and technical support to enable the WTA team to meet training requirements, scheduling, training aid, and training facilities maintenance and synchronization issues and provide quantifiable courses of action. The
WTA plans to leverage BedRock’s competency-based methodology to meet global training and training support requirements of the Warfighter FOCUS program.

BedRock has already proven its capability to meet the challenge of supporting the WTA by recently providing several Arabic linguists to serve as advanced role players in support of the 2nd Brigade Combat Team (2 BCT) live training exercises at Fort Campbell, Kentucky under the incumbent contract.

“As a small company, BedRock has provided big company solutions since its first government contract in 2001. We do this through people who have relevant and ready expertise and who focus on providing the right support to training-related programs.” David Dawson, BedRock’s CEO says. “This contract serves as a major milestone in the growth of our company and will cause us to make a few changes, but it will not distract us from doing what it is that got us to this point in our company’s history and that is: providing the right people to develop and implement customer-centric solutions and find a way to add value each day to every project we support.” Dawson added.

BedRock Company is a Service Disabled Veteran Owned Small Business supporting the U.S. military, civilian agencies, state and local governments, including commercial customers since 1998. BedRock provides training lifecycle support, information management, project management, and staffing solutions to clients who include the federal government and Fortune 100 defense and aerospace contractors. BedRock is a certified Secret Clearance Facility with headquarters in Radcliff, Kentucky. (www.bedrockinc.net)

Raytheon Company, with 2006 sales of $20.3 billion, is a technology leader specializing in defense, homeland security and other government markets throughout the world. With a history of innovation spanning more than 80 years, Raytheon provides state-of-the-art electronics, mission systems integration and other capabilities in the areas of sensing; effects; and command, control, communications and intelligence systems, as well as a broad range of mission support services. With headquarters in Waltham, Mass., Raytheon employs 73,000 people worldwide. (www.raytheon.com)

The WTA is an alliance of industry leaders in training support with proven, current and relevant experience across all training environments, including live, virtual and constructive. The alliance has submitted a proposal to the U.S. Army Program Executive Office, Simulation, Training and Instrumentation for the Warfighter FOCUS program. With a combined legacy of successfully executing large-scale and complex programs, the WTA is organized to apply the right resources to successfully accomplish each task and to deliver the best value, lowest risk solutions.
